## Security Services

Enterprise-grade cybersecurity delivered on-demand equals peace-of-mind

Regardless of their size or industry, organizations face common barriers to cybersecurity effectiveness. We level the playing field with access to powerful cybersecurity.

Digital transformation, remote work, distributed office locations, and an ever-changing global regulatory landscape are testing the bounds of traditional security – and introducing new risk. With cybersecurity complexity and costs accelerating, effective solutions can seem out of reach and hard to integrate.

Modern organizations like yours need protection delivered in a way that is simple, accessible, and fits your budget. In the face of today's cybersecurity challenges, it makes sense to partner with a firm like DC Consulting.

By partnering with SilverSky, DC Consulting provides one of the most comprehensive sets of cybersecurity services in the industry. Delivered as a managed services model with on-demand access, our services are backed by enterprise-grade, integrated technology and the skilled expertise to run it. The security operations centers monitors your on-premise, cloud, or hybrid environment for threats 24x7x365 – with real-time remediation capabilities.

**DC Consulting takes care of defending your organization – while you take care of business.**

## DC Consulting Managed Cybersecurity Services – Powered by SilverSky

### At A Glance

## Five Services That Strengthen Your Security Posture

Powered by SilverSky, DC Consulting has the most comprehensive set of enterprise-grade cybersecurity services in the industry. From detection to response and remediation, our teams deliver the cybersecurity coverage you need — when you need it.

### Managed Detection & Response

Monitors, investigates, and disrupts advanced threats in real-time inside the perimeter – across DNS, AD, email servers, security devices, and endpoints.

### Vulnerability Management

Identifies and prioritizes vulnerabilities using a risk-based approach, guides remediation, and performs validation scans to confirm success.

### Managed Endpoint Detection & Response

Delivers visibility into your growing endpoint environment, with detection and remediation supported by machine learning.

### Email Protection Services

Guards the #1 attack vector against phishing, malware, and ransomware attacks that threaten infiltration and compromise.

### Security Device Management

Extends threat protection beyond traditional perimeters to address security challenges along the modern network edge, including cloud and mobile networks.

## The Power Behind Our Services

### 1 Expertise

80% of our entire staff is dedicated to delivering for our customers:

#### Cybersecurity Operations Skills

Our security operations centers (SOCs) are staffed by our deep bench of certified analysts — among the best in the industry. Backed by a powerful technology stack, our experts work as an extension of your security team to monitor your environment for threats around-the-clock.

#### Dedicated, Customer-Centric Support

Our top-rated customer support team members are there when you need them, and deliver consistent, personalized, and knowledgeable assistance.

#### Industry-Specific Knowledge

The experts on our team serve organizations across multiple industries. We stay current on industry-specific threats, trends, and emerging regulations to ensure you remain compliant — and secure.

- ACET
- FFIEC
- GLBA
- HIPAA
- PCI-DSS
- SOC 2

### 2 Security Operations Centers

Three state-of-the-art SOCs — located in North America, Europe, and Asia — serve as command centers that centralize the activity feeds from all of our security services. Integrated enterprise-grade technologies, automated tools, and threat intelligence support our skilled SOC analysts, who provide active monitoring of your environment 24x7x365.

### 3 Integrated Technology Foundation

Our powerful platform includes the latest, best-in-class security operations technologies, proprietary solutions, and custom integrations that power our security services and SOCs. The result? Affordable, on-demand access to powerful, integrated security technologies that keep your organization safe — without the complexity of having to implement, run, and maintain them yourself.

## We Make Cybersecurity Simple. Affordable. Accessible.

Looking for a way to amplify your ability to detect and respond to threats in your modern environment? When considering the options, DC Consulting Security Services, powered by SilverSky, checks all the boxes – with distinct advantages over in-house and other managed solutions.
